

## **Spirituality and the UFO Community**

Spirituality is enjoying a huge revival. It's the topic of conversations, and the opportunity for new businesses. However, the business of spirituality is not the same as true spirituality. True Spirituality is not found in "spiritual smorgasbording"--sampling a little of everything, and wasting time by never committing to one's own spiritual discipline and growth.

True spiritual teachers are ones that teach what they have received, and what they have received is of the highest good for humanity.

You are being introduced to the "Teachers of Love" through Moriah. Some of you who are sensitive to energy may be aware of Energy presence. Some of you may begin to find that you are aware of answers to your internal questions. Some of you may find that you are challenged to take another step in your spiritual growth and development. All of you are receiving the invitation to join in the "Message of Love" given through Moriah by the "Teachers of Love". The Teachers of Love are High Spiritual Teachers who are assisting humanity in the evolution that is occurring.

You are part of a shift. However, the shift is not only a shift toward higher vibrations and consciousness. This shift is an evolutionary shift that will require the interaction of humans and non-humans. You will need to learn telepathy as they communicate without words. You will need to learn how to shield your thoughts, as your thoughts are apparent to, and understood by, non-human beings. You will need to learn to focus your thoughts to assist in the raising of vibrations that can protect you. This learning will be provided to us soon through curricula that Moriah will receive, teach, and publish for humanity's benefit.

In the UFO and spiritual communities there is much discussion regarding the intent of the extraterrestrials. First, it should be noted that they are of many different origins, from different worlds with different philosophies. They are not all benevolent. They are not all evil. However, they, in many cases, have been exploring our planet earth. They have different motives and methods. They have their own governments that they may represent. They are here for their own purposes. Where we may be of use, they may develop us. Where we are in the way, they may move or extinguish us. They will not allow us to destroy our own planet, and when we have been close to doing so, they have intervened. Some need new resources as their own are depleted. Some want to explore our biodiversity. To some we are simply another animal form. They are more technologically advanced; however, it is Love, spiritual energy, that will be our protection. Therefore, it is the primary responsibility of each person to develop spiritually through

this Teaching, his or her spiritual path, and by individual spiritual commitment and dedication.

Received from the *Teachers of Love*  
through a *Messenger named Moriah*
