

A Call to Arms

It has been said that humans belong to the earth. Indeed humans now belong to many worlds as they migrated from many original sources. Purely human is an abstract construct. Humans are many races from many continents seeded from many worlds.

Your study of archeology and other historical venues has brought you to the realization that other-than-humans have lived upon earth. They lived and died, leaving their contributions for discovery. Yet, little is understood of what remains.

The concept of being purely human can never be. You are conceived of many who preceded you. You are on the earth, but not of the earth. Earth is your human mother, but you are more than human.

The concept of hybrid is not new. Your ufologists use the term solely for designating the significance of human hybrids, those joined of humans and OTE (Other Than Earth) DNA. That is why there will be many surprising revelations as you learn more about the significance of DNA.

However, long before human-hybrid joining, there was seeding from the universe resulting, eventually, in life as you know it. However, it was not always so.

Do not be overly concerned with the concept of being purely human as it does not truly exist. All are joined with others, whether other derivatives of the human race, or those demonstrating gifts unknown to the human race.

All will join. All are already joined. All are One. It is so ordained.
